

retinol treatment for sensitive skin

Reduce signs of aging without irritation with this gentle retinol solution specifically formulated for sensitive skin. Retinol is paired with niacinamide, Inflacin® and the patented OmniSome delivery system for less irritation without sacrificing efficacy.

Before

Condition: Uneven surface texture and early signs of aging

After ten weeks

Solution: Facial Wash, Hydrating Serum, Retinol Treatment for Sensitive Skin, ReBalance, Weightless Protection Broad Spectrum SPF 45

*Photos not retouched.

Key ingredients:

Retinol (vitamin A) – converted to retinoic acid in the skin. Vitamin A helps to improve skin texture, and promote a clear complexion and an even skin tone.

Niacinamide – a potent and calming antioxidant that delivers multiple important benefits to the skin. It helps to reduce transepidermal water loss (TEWL) and improve barrier function. This is critical for bright, even skin. Additionally, niacinamide helps to reduce age-related skin yellowing and redness, and create an overall youthful appearance.

Hexylresorcinol – helps to promote an even skin tone and calm skin.

Inflacin® – a patented cosmetic ingredient shown to reduce the sub-clinical inflammation that contributes to aging.

Ceramide NP – supports the renewal of the skin's natural protective layer and forms an effective barrier against moisture loss; improves long-term moisturization and protects skin from external offenders.

Avena Sative (Oat) Kernal Extract – provides the powerful polyphenols avenanthramides that function to calm and soothe skin while reducing sensitivity.

Bisabolol – helps reduce inflammation and irritation while soothing skin and restoring suppleness; it also protects the skin against daily environmental stress.

Directions for use: In the evening, apply a pea-sized amount after cleansing. Begin by limiting use to twice a week, gradually increasing application frequency to every other night, and then advancing to each evening or as tolerated. Follow with the appropriate PCA SKIN® moisturizer. Mild irritation may initially be experienced and is not a sign of a negative complication. This product is indicated for use in the evening only. Daily broad spectrum sun protection is critical while using this product.
