Theradome™ LH80 PRO is an over-the-counter (OTC) device indicated for treatment of Androgenetic Alopecia to promote hair growth in females with female pattern hair loss (FPHL) on the Ludwig and Savin Hair Loss Scale I-II; Fitzpatrick Skin Types I-IV.

Laser Specifications

LLLT Power Proven to Stimulate Hair Restoring Cellular Activity

80x
LASER DIODES

Diodes
80 state-of-the-art lasers (not LEDs) – the most lasers in any OTC FDA cleared device – penetrate deeply to hair follicles without heat generation.

COOL AIRFLOW

Maximum Efficiency and User Comfort
Constructed to disperse heat and to cool lasers, our helmet generates less than 1 degree Celsius heat during a 20-min treatment session.

5 MM FOLLICLE DEPTH

Power and Penetration
Featuring the highest power and penetration available, designed for effective photo biostimulation that ensures deep-scalp LLLT absorption.

UP TO 18,000
20 MINUTE TREATMENTS

Reliability
Custom-made laser diodes of the highest quality, designed and tested to each last 6,000 operational hours - equivalent to up to 18,000 20-minute treatments.

FULL COVERAGE

Coverage
Maximum scalp coverage treats all areas affected by androgenetic alopecia for the best results.

0 SIDE EFFECTS

Safety
Safe and comfortable use, with zero side effects.

678
NANOMETERS

Wavelength
A clinically proven wavelength first used by pioneer Dr. Endre Mester and proven effective since 1965. Our lasers are optimally tuned to promote hair growth.

LOWEST COST

Cost Effective
The lowest cost per laser on the market delivering the highest dosage without generating heat.

Clinical Efficacy

Proven In Multiple Clinical Trials: LLLT Has Stabilized Hair Loss, Thickened Hair And Started New Hair Growth

98%+
SAW BENEFICIAL
RESULTS

Clinically Tested

In all clinical trials, >98% participants complying with treatment protocols benefited from usage with zero side effects.
